PROJECT REPORT
DIGITAL LITERACY

TITLE PAGE

NAME: Deepti Singh

REGISTRATION NO.: 25BAI10058

BRANCH: CSE AI/ML

COURSE CODE: CSE0001

DATE: 31ST March 2026

INTRODUCTION:

In today's digital world, understanding how to use technology responsibly and effectively has become extremely important.

This project focuses on building digital awareness, improving communication skills, and understanding online platforms. Throughout the project, I explored different aspects such as creating an infographic, setting up a digital portfolio, working with platforms, learning email etiquette, and studying cybercrime cases.

The main aim of this project was not only to gain technical knowledge but also to understand the ethical and responsible use of digital tools. It helped me develop practical skills like designing content, organizing information, and communicating professionally. Overall, this project gave me a better understanding of how digital systems work and how I can use them effectively in real life.

TASK-1

For this task, I created an infographic to visually represent important digital concepts in a simple and engaging way. I used an online design tool to organize information using icons, colors, and short text so that it becomes easy to understand at a glance.

While creating the infographic, I focused on maintaining clarity, proper structure, and visual appeal. I included key points related to digital awareness and ensured that the content was neither too crowded nor too minimal. Choosing the right colors and layout was important to make the infographic look professional.

This task helped me understand how powerful visual communication can be. Instead of long paragraphs, information can be shared quickly through visuals. I also learned how to balance design and content, which is an important skill in

today’s digital space. Overall, this task improved my creativity and presentation skills.

TASK-2

In this task, I created my digital portfolio to showcase my work and skills. I set up different platforms and organized my project files in a structured manner. The portfolio includes my tasks, reflections, and important documents, making it easy for anyone to view my work.

I understood the importance of maintaining a clean and complete profile. Writing a proper README file was also an important part of this task, as it explains what the project is about and how everything is organized.

Creating a digital portfolio made me realize how important it is to present your work professionally, especially in the online world. It acts like a personal brand where others can see your skills and progress. In the future, I can keep updating this portfolio with more projects, which will help me in academics and career opportunities.

TASK-3:

For this task, I explored different digital platforms and completed a coding-related challenge along with creating a Google Form. This helped me understand how different platforms work and how they can be used for various purposes like data collection, problem-solving, and sharing information.

While working on the coding challenge, I improved my logical thinking and problem-solving skills. It required patience and practice to complete the task correctly. Creating the Google

Form was also an interesting experience, as I learned how to design questions, collect responses, and analyze data.

This task showed me how digital platforms can be used in both academic and real-life situations. From surveys to coding, these tools are very useful. Overall, it helped me gain confidence in using technology more efficiently.

TASK-4:

In this task, I learned how to write professional emails with proper structure and tone. I understood the importance of using a clear subject line, polite language, and a formal format while communicating through email.

I practiced writing emails based on different scenarios, making sure that the message was respectful and easy to understand. I also followed a checklist to ensure that all important parts like greeting, body, and closing were included.

This task helped me improve my communication skills and made me more confident in writing formal emails. Email etiquette is very important in professional life, and this knowledge will be useful in future studies and jobs.

TASK-5:

This task focused on understanding cybercrime through a case study. I studied how cybercrimes happen, their impact, and how people can protect themselves online. The case study helped me understand real-life situations where people face issues like hacking, phishing, and identity theft.

I also created a checklist of safety measures such as using strong passwords, avoiding suspicious links, and being careful while sharing personal information online. These steps are simple but very effective in preventing cyber threats.

Through this task, I realized how important it is to stay alert and responsible while using the internet. Cybercrime is increasing day by day, and awareness is the best way to stay safe. This task helped me become more careful and informed as a digital user.

CONCLUSION:

In conclusion, this project was a valuable learning experience that improved both my technical and communication skills. Each task contributed to my understanding of digital tools, platforms, and online safety. I learned how to present information visually, create a professional portfolio, use digital platforms effectively, and communicate properly through emails.

The project also made me aware of cyber risks and the importance of responsible online behavior. Overall, this project helped me grow as a digital learner and prepared me for future challenges in the digital world.

REFLECTION:

While working on this project, I faced some challenges, especially in managing time and learning new tools. However, by practicing and exploring, I was able to complete all the tasks successfully.

This project helped me improve my creativity, thinking skills, and confidence. I also learned the importance of being

organized and consistent. If I get a chance to do this project again, I would try to make my work even more creative and detailed.

Overall, this was a great learning experience, and I gained many useful skills that I can apply in my future studies and real life.
